

TapeScore — Logo

Final mark & wordmark, construction, palette, and production notes for the designer. Editable SVG source is delivered alongside this sheet.

CONCEPT

The **S** is built from six candlesticks — the price wave you read. Candles are spaced along the letter by arc-length; where the curve doubled back and candles stacked, each pair was merged into **one long candle** (two long candles total), giving a natural short/long rhythm. The two ends are **amber candles marking Entry (bottom-left) and Exit (top-right)** — the same node language as the sibling brand MFEEdge. A faint “ghost” S sits behind purely as reinforcement. Tagline: **Game film for traders.**

CONSTRUCTION

Drawn on a **64-unit grid**. **Six candlesticks total**: 2 amber end candles (Entry / Exit, body 11u), 2 white tracer candles (body 9u), and 2 white “long” candles spanning the merged stacked ranges. Bodies width 5–6u, wicks ~1.6u. Ghost-S stroke 8u at ~14% opacity ink. Scales cleanly to any size; below ~24px drop the Entry/Exit labels (see favicon).

PALETTE

				
#0E0F11 surface	#E7E8E5 ink · dark	#17181A ink · light	#E0A33C amber	#B9802B amber · lt

Single accent only — amber. Ghost S #2b2f34 (dark) / #D7D5CE (light). Labels #9AA09A / #8A8E86.

TYPOGRAPHY — ACTION NEEDED

The wordmark is set in a system grotesque (Helvetica/Arial) as a placeholder. Please (1) select the final typeface — a neo-grotesque or geometric sans; strong free options: **Inter**, **Space Grotesk**, **Söhne**-alike — set “Tape” at medium (500) and “Score” at bold (800), tracking ≈ -1 ; and (2) **convert the wordmark to outlines** so it renders identically everywhere. Tagline is monospace, all-caps, +2.5 tracking.

CLEAR SPACE & USAGE

DO

- Keep clear space $\geq$ the height of the S-mark on all sides.
- Keep amber as the only accent; everything else ink/neutral.
- Preserve candle spacing and the short/long rhythm.
- Use the light lockup on light surfaces (deeper amber).

DON'T

- Recolor candles red/green or add more accent colors.
- Add gradients, shadows, glows, or 3-D.
- Stretch, rotate, or re-space the candles.
- Keep Entry/Exit labels below ~24px (use the favicon).
